- Writing code to develop Desktop applications, using HTML5/CSS3 and Java Script.
- Gathering information from consumers about program functionality.
- Supported and maintained the software within an IT system once it was in full operation.
- Monitored the effects of any changed code to see if it has affected the performance of any related software or systems.
- Produced an estimate of the time it will take to develop and implement any software updates.

PROJECTS

- ➢ **Personal Investment Manager**   **2015**
  Technologies used: Frontend- Asp.net 2010 with C#, Backend-Microsoft SQL server 2008
  - Designed an interactive application using Asp.net with C#.
  - With this App people can manage their finance or organize cash flow, expenses and bank accounts in one place.
  - This project Personal Investment Manager includes creating groups as you like. For e.g. your investment in IPO, Mutual Fund, Loan, LIC, share market, Credit Card. Money Tracking helps you to calculate your expanses, premiums, profit, loss using graphs & charts.
  - Learned and implemented the fundamental concept of data visualization, data preparation, model implementation and model evaluation.
- ➢ Weather App
  - Built with HTML, CSS, JavaScript, Bootstrap and Weather API.
  - People can check weather from anywhere or anytime with help of this app.
  - Learned how to use API to access weather data to create a forecast, including temperature.
- ➢ Password Generator
  - Create password generator with HTML, CSS and JavaScript.
  - With help of this we can establish a random or customized password for users.
- ➢ Quote Generator
  - Generate with HTML, CSS, JavaScript and Fit Api quote.
  - User get new quote and establish on twitter or share with friends.
